**Advanced
Wound Care**

If you didn't have a need for antimicrobial dressings before, you do now.

Covidien AMD antimicrobial dressings are part of a proven prophylactic infection prevention program. Unlike ordinary sterile dressings which do not provide an effective barrier to bacterial invasion, Covidien AMD antimicrobial dressings contain 0.2% Polyhexamethylene Biguanide (PHMB), a bacteria-killing polymer that virtually eliminates bacterial penetration through and growth within the dressings. PHMB is effective against both gram + and gram - bacteria as well as yeast and fungi, and effective against common problematic bacteria such as methicillin resistant Staphylococcus aureus (MRSA) and vancomycin resistant Enterococcus (VRE).

Kendall™ AMD antimicrobial foam dressings have been developed to support your efforts in managing both moisture and bacterial balance. The dressing is an open-cell polyurethane foam and is impregnated with 0.5% PHMB. Kendall AMD antimicrobial foam border dressings are designed to help prevent complications like friction and shear injuries.

NOTE: Do not use Covidien AMD antimicrobial dressings with Dakin's Solution™ cleanser or bleach solutions. These solutions deactivate PHMB and will cause yellowing of the product.

Kendall™ Foam Border Gentle Adhesion Dressings

- Gentle silicone adhesive minimizes skin trauma and remains adherent after adjusting the dressing.
- High MVTR (Moisture Vapor Transmission Rate) backing provides a waterproof microbial barrier, as well as reducing friction and shear.*
- Small pore-size helps to prevent microbe and cell in-growth, while also giving it a soft feel and to help relieve pressure.

Curi-Strip™ Adhesive Wound Closures

- Gentle adhesive keeps wound closed with movement, stretching and skin expansion.
- Conformable spunbound nylon backing free of reinforcing filaments for increased freedom of movement; helps minimize premature "pop-off" and formation of stress blisters.
- Highly porous backing for increased oxygen exposure.
- Superior moisture vapor transmission for minimal skin maceration.
- Curl resistance after packaging removal facilitates easy application.
